

LONG-SPAN SHELVING

The fully adjustable long-span shelving system is designed for storage of light to medium loads. It lends itself to use in almost any situation. The construction is similar to pallet racks, it comprises frames, beams and either powder coated steel inserts or timber shelves.

The upright is perforated at a pitch of 50mm allowing bolt-less mounting of the beams. The tapered shape of the hook guarantees a stable and rigid design, even without back bracing.

POWDER COATED STEEL INSERTS

All shelving units are 2m high with 4 shelves. Prices shown include GST.

Beam Length	600mm(D)	900mm(D)
1200mm	\$381	\$434
1800mm	\$477	\$545
2400mm	\$601	\$685

WOODEN SHELVES

All shelving units are 2m high with 4 shelves. Prices shown include GST.

Beam Length	400mm(D)	600mm(D)	900mm(D)
