

LONG-SPAN

The fully adjustable long-span shelving system is designed for storage of light to medium loads. It lends itself to use in almost any situation. The units comprises frames, beams and either powder coated steel inserts or timber shelves.

The upright allowing bolt-less mounting of the beams – easy installation. Extra safety is provided with safety pins to keep the beams in place, preventing them from being bumped out. Proper footplates make for very stable units.

Heights:

Our units are standard either 2.0m or 2.4m high. Frames can be customized cut down to a specific height if required.

The number of shelf levels depends on the client's needs - More shelves can be added at any time.

Powder coated shelves

Wooden shelves

Beam lengths:

Beams are 1200, 1800 or 2400
