

## LONG-SPAN SHELVING

The fully adjustable long-span shelving system is designed for storage of light to medium loads. It lends itself to use in almost any situation. The construction is similar to pallet racks, it comprises frames, beams and either powder coated steel inserts or timber shelves.

The upright is perforated at a pitch of 50mm allowing bolt-less mounting of the beams. The tapered shape of the hook guarantees a stable and rigid design, even without back bracing.

Our units are either 2.0m or 2.4m high with standard 4 shelf levels. More shelves can be added as needed

Beam lengths are 1200, 1800 or 2400 with depths of 400, 600 or 900

Beam Length	1200mm	1800mm	2400mm
Load Rating per Shelf level	793kg	529kg	372kg

Support beams for 900 deep timber shelves now available!
